### DESCRIPTION

This transparent film has been designed to be applied to windows in such a way as to be virtually invisible. It slows down UVA and B rays to prevent discolouration of shop windows or certain illnesses linked to UVA and UVB rays.

### DIMENSIONS

BY ROLL :

1,52 x 10 m  
30 m

### METHOD OF APPLICATION

The surface to be bonded must be free from dust, grease or any other contaminant. Some materials, such as polycarbonate, can cause bubbling problems. A compatibility test is therefore recommended. Can be installed on plexiglass and polycarbonate.

### PRODUCTION AND STANDARDS

In order to constantly improve our products, we may modify colours and manufacturing processes without prior notice. Before applying our films, we recommend that users ensure that they are suitable for the intended use and comply with current standards.

**SUSTAINABILITY** : 10 years for vertical applications in Central Europe.

**USE** : For all types of glazing.

**MAINTENANCE** : After 30 days with a standard cleaning solution (non-abrasive, ammonia-free, etc.). Do not use cleaning products that could scratch the surface.

**STORAGE** : 2 years from delivery. This film should be stored away from excessive humidity and sunlight, at a temperature below 38°C.

In order to meet the highest standards, we recommend that you do not mix films from different productions.
